INDIVIDUALS REACHED THROUGH EDUCATIONAL PROGRAMS!

Prevention of AEP - How Did We Get Here and Where Are We Going?

An engaging new training that takes participants on a journey through time, exploring how messages about alcohol use have evolved, especially when it comes to pregnancy. Attendees dive into current guidelines for expecting moms and uncover surprising statistics about alcohol consumption among women of childbearing age.

Interventions and Strategies for Working with FASD

Examines how prenatal alcohol exposure affects the developing brain and provides suggestions for strategies and interventions proven to be successful among children within this neurodiverse population.

The Indiana Coalition on Prenatal Substance Exposure made significant progress this year:

- Held 6 bi-monthly meetings and welcomed 5 new members
- Formed 3 subcommittees focusing on Education, Policy Change & Advocacy, and Family Support
- Implemented alternating bi-monthly subcommittee meetings
- Established independent goals for each subcommittee
- Welcomed Heidi Blake as the new Chair

This structure highlights the Coalition's growth, organizational improvements, and renewed focus on key areas of prenatal substance exposure awareness and support.
